

Phases and Activities of the Wraparound Process

Acknowledgments:

We would like to thank the following Advisory Group members for participating in the NWI’s effort to define the phases and activities of the wraparound process:

A. Michael Booth
Beth Larson-Steckler
Bill Reay
Carl Schick
Carol Schneider
Christina Breault
Christine S. Davis
Collette Lueck
Constance Burgess
Constance Conklin
David Osher
Dawn Hensley
Don Koenig

Phases and Activities of the Wraparound Process: Building Agreement About a Practice Model

Eric Bruns, Co-Director, National Wraparound Initiative, and Associate Professor, University of Washington School of Medicine

Janet Walker, Co-Director, National Wraparound Initiative, and Research Associate Professor, Portland State University School of Social Work

In 2004, the National Wraparound Initiative (NWI) focused its attention on building agreement about essential elements of wraparound practice.¹ To begin this work, a small core group came together to review existing wraparound manuals and training materials. This core group, which included researchers, trainer/consultants, family members and administrators, used these materials as the basis for an initial version of a practice model. This initial version saw the wraparound process as consisting of a series of activities grouped into four phases: engagement, initial plan development, plan implementation, and transition.

This initial version of the practice model was circulated by email to an additional ten NWI members, primarily administrators of well-regarded wraparound programs. These stakeholders provided feedback in written and/or verbal form. This feedback was synthesized by the NWI coordinators and incorporated into a new draft of the practice model, which was reviewed and approved by the core group. The practice model that emerged from this process did not include any activities that were completely new (i.e., all the activities had appeared in one or more of the existing manuals or materials). However, the overall model was still quite different from any single model that had been described previously.

¹ A more detailed description of the process for defining the practice model can be found in Walker, J. S., & Bruns, E. J. (2006). Building on practice-based evidence: Using expert perspectives to define the wraparound process. *Psychiatric Services*, 57, 1579-1585.

As a next step in building agreement about practice, the core group sought feedback from the entire NWI advisory group which, at the time, had grown to include 50 members. Advisors were

Teams may use a variety of processes or procedures for eliciting needs or goals.

asked to rate each activity in the model in two ways: first, to indicate whether an activity like the one described was essential, optional, or inadvisable for wraparound; and second, whether, as written, the description of the activity was fine, acceptable with minor revisions, or unacceptable. Advisors were also given the opportunity to provide open-ended feedback about each activity, about the grouping of activi-

ties into phases, and about whether or not there were essential activities missing from the practice model.

Overall, the 31 advisors who provided feedback expressed a very high level of agreement with the proposed set of activities. For 23 of the 31 activities presented, there all or all but one of the advisors agreed that the activity was essential. Advisors also found proposed descriptions of the activities generally acceptable. For 20 of the 31 proposed activities, the advisors were unanimous in finding the description acceptable.

The coordinators again revised the phases and activities, incorporating the feedback from the advisors. A document was prepared that described the phases and activities in more detail, and provided notes on each activity. These notes provided additional miscellaneous information, including the purpose of the activity, documentation or other products that should emerge from the activity, and/or cautions or challenges that might arise during the course of the activity. This document was reviewed by the core group and accepted by consensus.

The practice model, together with some of

the commentary that accompanied it in its original form, is reproduced in the pages that follow. The final model included 32 activities grouped into the four phases. The intention was to define the activities in a manner that is sufficiently precise to permit fidelity measurement, but also sufficiently flexible to allow for diversity in the manner in which a given activity might be accomplished. The intention is to provide a “skeleton” of essential activities that can be accomplished or “fleshed out” in ways that are appropriate for individual communities or even individual teams. For example, an important activity during the phase of initial plan development is for the team to elicit a range of needs or goals for the team to work on, and then prioritize a small number of these to work on first. The practice model specifies that both of these two steps must happen, but does not specify *how* the steps should happen. Teams may use a variety of processes or procedures for eliciting needs or goals, and priority needs or goals can be selected using any of a variety of forms of decision making, including forms of voting or consensus building.

The remainder of this chapter is reproduced from the original *Phases and Activities* document. It begins with a few points that are important to keep in mind when reading about the phases and activities. Following these notes, the document lists and defines each of the four phases of the wraparound process. For each phase, the document describes the main goals to be accomplished in the phase and the activities that are carried out to meet each goal.

Phases and Activities of the Wraparound Process²

Some notes:

- *The activities that follow identify a facilitator as responsible for guiding, motivating, or undertaking the various activities. This is not meant to imply that a single person must facilitate all of the activities, and we have not tried to specify exactly who should be responsible for each activity. The various activities may be split up among a number of different people. For example, on many teams, a parent partner or advocate takes responsibility for some activities associated with family and youth engagement, while a care coordinator is responsible for other activities. On other teams, a care coordinator takes on most of the facilitation activities with specific tasks or responsibilities taken on by a parent, youth, and/or other team members. In addition, facilitation of wraparound team work may transition between individuals over time, such as from a care coordinator to a parent, family member, or other natural support person, during the course of a wraparound process.*
- *The families participating in wraparound, like American families more generally, are diverse in terms of their structure and composition. Families may be a single biological or adoptive parent and child or youth, or may include grandparents and other extended family members as part of the central family group. If the court has assigned custody of the child or youth to some public agency (e.g., child protective services or juvenile justice), the caregiver in the permanency setting and/or another person designated by that agency (e.g. foster parent, social worker, probation officer) takes on some or all of the roles and responsibilities of a parent for that child and shares in selecting the team and prioritizing objectives and options. As youth become more mature and independent, they begin to make more of their own decisions, including inviting members to join the team and guiding aspects of the wraparound process.*
- *The use of numbering for the phases and activities described below is not meant to imply that the activities must invariably be carried out in a specific order, or that one activity or phase must be finished before another can be started. Instead, the numbering and ordering is meant to convey an overall flow of activity and attention. For example, focus on transition activities is most apparent during the latter portions of the wraparound process; however, attention to transition issues begins with the earliest activities in a wraparound process.*

Phases and Activities of the Wraparound Process: Phase 1

MAJOR GOALS	ACTIVITIES	NOTES
<p>PHASE 1: Engagement and team preparation</p>		
<p><i>During this phase, the groundwork for trust and shared vision among the family and wrap-around team members is established, so people are prepared to come to meetings and collaborate. During this phase, the tone is set for teamwork and team interactions that are consistent with the wraparound principles, particularly through the initial conversations about strengths, needs, and culture. In addition, this phase provides an opportunity to begin to shift the family's orientation to one in which they understand they are an integral part of the process and their preferences are prioritized. The activities of this phase should be completed relatively quickly (within 1-2 weeks if possible), so that the team can begin meeting and establish ownership of the process as quickly as possible.</i></p>		
<p style="text-align: center;"><i>1.1. Orient the family and youth</i></p> <p>GOAL: To orient the family and youth to the wraparound process.</p>	<p style="text-align: center;"><i>1.1 a. Orient the family and youth to wraparound</i></p> <p>In face-to-face conversations, the facilitator explains the wraparound philosophy and process to family members and describes who will be involved and the nature of family and youth/child participation. Facilitator answers questions and addresses concerns. Facilitator describes alternatives to wraparound and asks family and youth if they choose to participate in wraparound. Facilitator describes types of supports available to family and youth as they participate on teams (e.g., family/youth may want coaching so they can feel more comfortable and/or effective in partnering with other team members).</p>	<p>This orientation to wraparound should be brief and clear, and should avoid the use of jargon, so as not to overwhelm family members. At this stage, the focus is on providing enough information so that the family and youth can make an informed choice regarding participation in the wrap-around process. For some families, alternatives to wraparound may be very limited and/or non-participation in wraparound may bring negative consequences (as when wraparound is court ordered); however, this does not prevent families/youth from making an informed choice to participate based on knowledge of the alternatives and/or the consequences of non-participation.</p>
	<p style="text-align: center;"><i>1.1 b. Address legal and ethical issues</i></p> <p>Facilitator reviews all consent and release forms with the family and youth, answers questions, and explains options and their consequences. Facilitator discusses relevant legal and ethical issues (e.g., mandatory reporting), informs family of their rights, and obtains necessary consents and release forms before the first team meeting.</p>	<p>Ethical and legal considerations will also need to be reviewed with the entire team as described in phase 2.</p>

Phases and Activities of the Wraparound Process: Phase 1 (CONTINTUED)

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>1.2. Stabilize crises</i></p> <p>GOAL: To address pressing needs and concerns so that the family and team can give their attention to the wraparound process.</p>	<p><i>1.2 a. Ask family and youth about immediate crisis concerns</i></p> <p>Facilitator elicits information from the family and youth about immediate safety issues, current crises, or crises that they anticipate might happen in the very near future. These may include crises stemming from a lack of basic needs (e.g., food, shelter, utilities such as heat or electricity).</p>	<p>The goal of this activity is to quickly address the most pressing concerns. The whole team engages in proactive and future-oriented crisis/safety planning during phase 2. As with other activities in this phase, the goal is to do no more than necessary prior to convening the team, so that the facilitator does not come to be viewed as the primary service provider and so that team as a whole can feel ownership for the plan and the process.</p>
	<p><i>1.2 b. Elicit information from agency representatives and potential team members about immediate crises or potential crises</i></p> <p>Facilitator elicits information from the referring source and other knowledgeable people about pressing crisis and safety concerns.</p>	<p>Information about previous crises and their resolution can be useful in planning a response in 1.2.c.</p>
	<p><i>1.2 c. If immediate response is necessary, formulate a response for immediate intervention and/or stabilization</i></p> <p>Facilitator and family reach agreement about whether concerns require immediate attention and, if so, work to formulate a response that will provide immediate relief while also allowing the process of team building to move ahead.</p>	<p>This response should describe clear, specific steps to accomplish stabilization.</p>
<p><i>1.3. Facilitate conversations with family and youth/child</i></p> <p>GOAL: To explore individual and family strengths, needs, culture, and vision and to use these to develop a document that will serve as the starting point for planning.</p>	<p><i>1.3 a. Explore strengths, needs, culture, and vision with child/youth and family.</i></p> <p>Facilitator meets with the youth/child and family to hear about their experiences; gather their perspective on their individual and collective strengths, needs, elements of culture, and long-term goals or vision; and learn about natural and formal supports. Facilitator helps family identify potential team members and asks family to talk about needs and preferences for meeting arrangements (location, time, supports needed such as child care, translation).</p>	<p>This activity is used to develop information that will be presented to and augmented by the team in phase 2. Family members should be encouraged to consider these topics broadly.</p>

Phases and Activities of the Wraparound Process: Phase 1 (CONTINTUED)

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>1.3. Facilitate conversations with family and youth/child</i></p> <p>GOAL: To explore individual and family strengths, needs, culture, and vision and to use these to develop a document that will serve as the starting point for planning. <i>(Continued from previous page)</i></p>	<p><i>1.3 b. Facilitator prepares a summary document</i></p> <p>Using the information from the initial conversations with family members, the facilitator prepares a strengths-based document that summarizes key information about individual family member strengths and strengths of the family unit, as well as needs, culture, and vision. The family then reviews and approves the summary.</p>	
<p><i>1.4. Engage other team members</i></p> <p>GOAL: To gain the participation of team members who care about and can aid the youth/child and family, and to set the stage for their active and collaborative participation on the team in a manner consistent with the wraparound principles</p>	<p><i>1.4 a. Solicit participation/ orient team members</i></p> <p>Facilitator, together with family members if they so choose, approaches potential team members identified by the youth and family. Facilitator describes the wraparound process and clarifies the potential role and responsibilities of this person on the team. Facilitator asks the potential team members if they will participate. If so, facilitator talks with them briefly to learn their perspectives on the family’s strengths and needs, and to learn about their needs and preferences for meeting.</p>	<p>The youth and/or family may choose to invite potential team members themselves and/or to participate in this activity alongside the facilitator. It is important, however, not to burden family members by establishing (even inadvertently) the expectation that they will be primarily responsible for recruiting and orienting team members.</p>
<p><i>1.5. Make necessary meeting arrangements</i></p> <p>GOAL: To ensure that the necessary procedures are undertaken so the team is prepared to begin an effective wraparound process.</p>	<p><i>1.5 a. Arrange meeting logistics</i></p> <p>Facilitator integrates information gathered from all sources to arrange meeting time and location and to assure the availability of necessary supports or adaptations such as translators or child care. Meeting time and location should be accessible and comfortable, especially for the family but also for other team members. Facilitator prepares materials—including the document summarizing family members’ individual and collective strengths, and their needs, culture, and vision—to be distributed to team members.</p>	

Phases and Activities of the Wraparound Process: Phase 2

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>PHASE 2: Initial plan development</i></p> <p><i>During this phase, team trust and mutual respect are built while the team creates an initial plan of care using a high-quality planning process that reflects the wraparound principles. In particular, youth and family should feel, during this phase, that they are heard, that the needs chosen are ones they want to work on, and that the options chosen have a reasonable chance of helping them meet these needs. This phase should be completed during one or two meetings that take place within 1-2 weeks, a rapid time frame intended to promote team cohesion and shared responsibility toward achieving the team’s mission or overarching goal.</i></p>		
<p style="text-align: center;"><i>2.1. Develop an initial plan of care</i></p> <p>GOAL: To create an initial plan of care using a high-quality team process that elicits multiple perspectives and builds trust and shared vision among team members, while also being consistent with the wraparound principles</p>	<p style="text-align: center;"><i>2.1 a. Determine ground rules</i></p> <p>Facilitator guides team in a discussion of basic ground rules, elicits additional ground rules important to team members, and facilitates discussion of how these will operate during team meetings. At a minimum, this discussion should address legal and ethical issues—including confidentiality, mandatory reporting, and other legal requirements—and how to create a safe and blame-free environment for youth/family and all team members. Ground rules are recorded in team documentation and distributed to members.</p>	<p>In this activity, the team members define their collective expectations for team interaction and collaboration. These expectations, as written into the ground rules, should reflect the principles of wraparound. For example, the principles stress that interactions should promote family and youth voice and choice and should reflect a strengths orientation. The principles also stress that important decisions are made within the team.</p>
	<p style="text-align: center;"><i>2.1 b. Describe and document strengths</i></p> <p>Facilitator presents strengths from the summary document prepared during phase 1, and elicits feedback and additional strengths, including strengths of team members and community.</p>	<p>While strengths are highlighted during this activity, the wraparound process features a strengths orientation throughout.</p>
	<p style="text-align: center;"><i>2.1 c. Create team mission</i></p> <p>Facilitator reviews youth and family’s vision and leads team in setting a team mission, introducing idea that this is the overarching goal that will guide the team through phases and, ultimately, through transition from formal wrap-around.</p>	<p>The team mission is the collaboratively set, long-term goal that provides a one or two sentence summary of what the team is working towards.</p>

Phases and Activities of the Wraparound Process: Phase 2 (CONTINTUED)

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>2.1. Develop an initial plan of care</i></p> <p>GOAL: To create an initial plan of care using a high-quality team process that elicits multiple perspectives and builds trust and shared vision among team members, while also being consistent with the wrap-around principles <i>(Continued from previous page)</i></p>	<p><i>2.1 d. Describe and prioritize needs/goals</i></p> <p>Facilitator guides the team in reviewing needs and adding to list. The facilitator then guides the team in prioritizing a small number of needs that the youth, family, and team want to work on first, and that they feel will help the team achieve the mission.</p>	<p>The elicitation and prioritization of needs is often viewed as one of the most crucial and difficult activities of the wraparound process. The team must ensure that needs are considered broadly, and that the prioritization of needs reflects youth and family views about what is most important. Needs are not services but rather broader statements related to the underlying conditions that, if addressed, will lead to the accomplishment of the mission.</p>
	<p><i>2.1 e. Determine goals and associated outcomes and indicators for each goal</i></p> <p>Facilitator guides team in discussing a specific goal or outcome that will represent success in meeting each need that the team has chosen to work on. Facilitator guides the team in deciding how the outcome will be assessed, including specific indicators and how frequently they will be measured.</p>	<p>Depending on the need being considered, multiple goals or outcomes may be determined. Similarly, for each goal or outcome determined by the team for measurement, multiple indicators may be chosen to be tracked by the team. However, the plan should not include so many goals, outcomes, or indicators that team members become overwhelmed or tracking of progress becomes difficult.</p>
	<p><i>2.1 f. Select strategies</i></p> <p>Facilitator guides the team in a process to think in a creative and open-ended manner about strategies for meeting needs and achieving outcomes. The facilitator uses techniques for generating multiple options, which are then evaluated by considering the extent to which they are likely to be effective in helping reach the goal, outcome, or indicator associated with the need; the extent to which they are community based, the extent to which they build on/incorporate strengths; and the extent to which they are consistent with family culture and values. When evaluating more formal service and support options, facilitator aids team in acquiring information about and /or considering the evidence base for relevant options.</p>	<p>This activity emphasizes creative problem solving, usually through brainstorming or other techniques, with the team considering the full range of available resources as they come up with strategies to meet needs and achieve outcomes. Importantly, this includes generating strategy options that extend beyond formal services and reach families through other avenues and time frames. These are frequently brainstormed by the team, with the youth and family and people representing their interpersonal and community connections being primary nominators of such supports. Finally, in order to best consider the evidence base for potential strategies or supports, it may be useful for a wraparound team or program to have access to and gain counsel from a point person who is well-informed on the evidence base.</p>

Phases and Activities of the Wraparound Process: Phase 2 (CONTINTUED)

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>2.1. Develop an initial plan of care</i></p> <p>GOAL: To create an initial plan of care using a high-quality team process that elicits multiple perspectives and builds trust and shared vision among team members, while also being consistent with the wraparound principles (<i>Continued from previous page</i>)</p>	<p><i>2.1 g. Assign action steps</i></p> <p>Team assigns responsibility for undertaking action steps associated with each strategy to specific individuals and within a particular time frame.</p>	<p>Action steps are the separate small activities that are needed to put a strategy into place, for example, making a phone call, transporting a child, working with a family member, finding out more information, attending a support meeting, arranging an appointment. While all team members will not necessarily participate at the same level, all team members should be responsible for carrying out action steps. Care should be taken to ensure that individual team members, particularly the youth and family, are not overtaxed by the number of action steps they are assigned.</p>
<p><i>2.2. Develop crisis/safety plan</i></p> <p>GOAL: To identify potential problems and crises, prioritize according to seriousness and likelihood of occurrence, and create an effective and well-specified crisis prevention and response plan that is consistent with the wraparound principles. A more proactive safety plan may also be created.</p>	<p><i>2.2 a. Determine potential serious risks</i></p> <p>Facilitator guides the team in a discussion of how to maintain the safety of all family members and things that could potentially go wrong, followed by a process of prioritization based on seriousness and likelihood of occurrence.</p>	<p>Past crises, and the outcomes of strategies used to manage them, are often an important source of information in current crisis/safety planning.</p>
	<p><i>2.2 b. Create crisis/safety plan</i></p> <p>In order of priority, the facilitator guides team in discussion of each serious risk identified. The discussion includes safety needs or concerns and potential crisis situations, including antecedents and associated strategies for preventing each potential type of crisis, as well as potential responses for each type of crisis. Specific roles and responsibilities are created for team members. This information is documented in a written crisis plan. Some teams may also undertake steps to create a separate safety plan, which specifies all the ways in which the wraparound plan addresses potential safety issues.</p>	<p>One potential difficulty with this activity is the identification of a large number of crises or safety issues can mean that the crisis/safety plan “takes over” from the wraparound plan. The team thus needs to balance the need to address all risks that are deemed serious with the need to maintain focus on the larger wraparound plan as well as youth, family, and team strengths.</p>
<p><i>2.3. Complete necessary documentation and logistics</i></p>	<p><i>2.3 a. Complete documentation and logistics</i></p> <p>Facilitator guides team in setting meeting schedule and determining means of contacting team members and distributing documentation to team members.</p>	

Phases and Activities of the Wraparound Process: Phase 3

MAJOR GOALS	ACTIVITIES	NOTES
<p>PHASE 3: Implementation</p> <p><i>During this phase, the initial wraparound plan is implemented, progress and successes are continually reviewed, and changes are made to the plan and then implemented, all while maintaining or building team cohesiveness and mutual respect. The activities of this phase are repeated until the team’s mission is achieved and formal wraparound is no longer needed.</i></p>		
<p><i>3.1. Implement the wraparound plan</i></p> <p>GOAL: To implement the initial plan of care, monitoring completion of action steps and strategies and their success in meeting need and achieving outcomes in a manner consistent with the wraparound principles.</p>	<p><i>3.1 a. Implement action steps for each strategy</i></p> <p>For each strategy in the wraparound plan, team members undertake action steps for which they are responsible. Facilitator aids completion of action steps by checking in and following up with team members; educating providers and other system and community representatives about wraparound as needed; and identifying and obtaining necessary resources.</p>	<p>The level of need for educating providers and other system and community representatives about wraparound varies considerably from one community to another. Where communities are new to the type of collaboration required by wraparound, getting provider “buy in” can be very difficult and time consuming for facilitators. Agencies implementing wraparound should be aware of these demands and be prepared to devote sufficient time, resources, and support to this need.</p>
	<p><i>3.1 b. Track progress on action steps</i></p> <p>Team monitors progress on the action steps for each strategy in the plan, tracking information about the timeliness of completion of responsibilities assigned to each team member, fidelity to the plan, and the completion of the requirements of any particular intervention.</p>	<p>Using the timelines associated with the action steps, the team tracks progress. When steps do not occur, teams can profit from examining the reasons why not. For example, teams may find that the person responsible needs additional support or resources to carry out the action step, or, alternatively, that different actions are necessary.</p>
	<p><i>3.1 c. Evaluate success of strategies</i></p> <p>Using the outcomes/indicators associated with each need, the facilitator guides the team in evaluating whether selected strategies are helping team meet the youth and family’s needs.</p>	<p>Evaluation should happen at regular intervals. Exactly how frequently may be determined by program policies and/or the nature of the needs/goals. The process of evaluation should also help the team maintain focus on the “big picture” defined by the team’s mission: Are these strategies, by meeting needs, helping achieve the mission?</p>
	<p><i>3.1. d. Celebrate successes</i></p> <p>The facilitator encourages the team to acknowledge and celebrate successes, such as when progress has been made on action steps, when outcomes or indicators of success have been achieved, or when positive events or achievements occur.</p>	<p>Acknowledging success is one way of maintaining a focus on the strengths and capacity of the team and its members. Successes do not have to be “big”, nor do they necessarily have to result directly from the team plan. Some teams make recognition of “what’s gone right” a part of each meeting.</p>

Phases and Activities of the Wraparound Process: Phase 3 (CONTINTUED)

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>3.2. Revisit and update the plan</i></p> <p>GOAL: To use a high quality team process to ensure that the wraparound plan is continually revisited and updated to respond to the successes of initial strategies and the need for new strategies.</p>	<p><i>3.2. a. Consider new strategies as necessary</i></p> <p>When the team determines that strategies for meeting needs are not working, or when new needs are prioritized, the facilitator guides the team in a process of considering new strategies and action steps using the process described in activities 2.1.f and 2.1.g.</p>	<p>Revising of the plan takes place in the context of the needs identified in 2.1.d. Since the needs are in turn connected to the mission, the mission helps to guide evaluation and plan revisions.</p>
<p><i>3.3. Maintain/build team cohesiveness and trust</i></p> <p>GOAL: To maintain awareness of team members' satisfaction with and "buy-in" to the process, and take steps to maintain or build team cohesiveness and trust.</p>	<p><i>3.3 a. Maintain awareness of team members' satisfaction and "buy-in"</i></p> <p>Facilitator makes use of available information (e.g., informal chats, team feedback, surveys—if available) to assess team members' satisfaction with and commitment to the team process and plan, and shares this information with the team as appropriate. Facilitator welcomes and orients new team members who may be added to the team as the process unfolds.</p>	<p>Many teams maintain formal or informal processes for addressing team member engagement or "buy in", e.g. periodic surveys or an end-of-meeting wrap-up activity. In addition, youth and family members should be frequently consulted about their satisfaction with the team's work and whether they believe it is achieving progress toward their long-term vision, especially after major strategizing sessions. In general, however, this focus on assessing the process of teamwork should not eclipse the overall evaluation that is keyed to meeting identified needs and achieving the team mission.</p>
	<p><i>3.3 b. Address issues of team cohesiveness and trust</i></p> <p>Making use of available information, facilitator helps team maintain cohesiveness and satisfaction (e.g., by continually educating team members—including new team members—about wraparound principles and activities, and/or by guiding team in procedures to understand and manage disagreement, conflict, or dissatisfaction).</p>	<p>Teams will vary in the extent to which issues of cohesiveness and trust arise. Often, difficulties in this area arise from one or more team members' perceptions that the team's work—and/or the overall mission or needs being currently addressed—is not addressing the youth and family's "real" needs. This points to the importance of careful work in deriving the needs and mission in the first place, since shared goals are essential to maintaining team cohesiveness over time.</p>
<p><i>3.4. Complete necessary documentation and logistics</i></p>	<p><i>3.4 a. Complete documentation and logistics</i></p> <p>Facilitator maintains/updates the plan and maintains and distributes meeting minutes. Team documentation should record completion of action steps, team attendance, use of formal and informal services and supports, and expenditures. Facilitator documents results of reviews of progress, successes, and changes to the team and plan. Facilitator guides team in revising meeting logistics as necessary and distributes documentation to team members.</p>	<p>Team documentation should be kept current and updated, and should be distributed to and/or available to all team members in a timely fashion.</p>

Phases and Activities of the Wraparound Process: Phase 4

MAJOR GOALS	ACTIVITIES	NOTES
<p>PHASE 4: Transition</p> <p><i>During this phase, plans are made for a purposeful transition out of formal wraparound to a mix of formal and natural supports in the community (and, if appropriate, to services and supports in the adult system). The focus on transition is continual during the wraparound process, and the preparation for transition is apparent even during the initial engagement activities.</i></p>		
<p><i>4.1. Plan for cessation of formal wraparound</i></p> <p>GOAL: To plan a purposeful transition out of formal wraparound in a way that is consistent with the wraparound principles, and that supports the youth and family in maintaining the positive outcomes achieved in the wraparound process.</p>	<p><i>4.1 a. Create a transition plan</i></p> <p>Facilitator guides the team in focusing on the transition from wraparound, reviewing strengths and needs and identifying services and supports to meet needs that will persist past formal wraparound.</p>	<p>Preparation for transition begins early in the wraparound process, but intensifies as team meets needs and moves towards achieving the mission. While formal supports and services may be needed post-transition, the team is attentive to the need for developing a sustainable system of supports that is not dependent on formal wraparound. Teams may decide to continue wraparound—or a variation of wraparound—even after it is no longer being provided as a formal service.</p>
	<p><i>4.1 b. Create a post-transition crisis management plan</i></p> <p>Facilitator guides the team in creating post-wraparound crisis management plan that includes action steps, specific responsibilities, and communication protocols. Planning may include rehearsing responses to crises and creating linkage to post-wraparound crisis resources.</p>	<p>At this point in transition, youth and family members, together with their continuing supports, should have acquired skills and knowledge in how to manage crises. Post-transition crisis management planning should acknowledge and capitalize on this increased knowledge and strengthened support system. This activity will likely include identification of access points and entitlements for formal services that may be used following formal wraparound.</p>
	<p><i>4.1 c. Modify wraparound process to reflect transition</i></p> <p>New members may be added to the team to reflect identified post-transition strategies, services, and supports. The team discusses responses to potential future situations, including crises, and negotiates the nature of each team member’s post-wraparound participation with the team/family. Formal wraparound team meetings reduce frequency and ultimately cease.</p>	<p>Teams may continue to meet using a wraparound process (or other process or format) even after formal wraparound has ended. Should teamwork continue, family members and youth, or other supports, will likely take on some or all of the facilitation and coordination activities.</p>

Phases and Activities of the Wraparound Process: Phase 4 (CONTINTUED)

MAJOR GOALS	ACTIVITIES	NOTES
<p><i>4.2. Create a “commencement”</i></p> <p>GOAL: To ensure that the cessation of formal wrap-around is conducted in a way that celebrates successes and frames transition proactively and positively.</p>	<p><i>4.2 a. Document the team’s work</i></p> <p>Facilitator guides team in creating a document that describes the strengths of the youth/child, family, and team members, and lessons learned about strategies that worked well and those that did not work so well. Team participates in preparing/reviewing necessary final reports (e.g., to court or participating providers, where necessary)</p>	<p>This creates a package of information that can be useful in the future.</p>
	<p><i>4.2 b. Celebrate success</i></p> <p>Facilitator encourages team to create and/or participate in a culturally appropriate “commencement” celebration that is meaningful to the youth/child, family, and team, and that recognizes their accomplishments.</p>	<p>This activity may be considered optional. Youth/child and family should feel that they are ready to transition from formal wraparound, and it is important that “graduation” is not constructed by systems primarily as a way to get families out of services.</p>
<p><i>4.3. Follow-up with the family</i></p> <p>GOAL: To ensure that the family is continuing to experience success after wraparound and to provide support if necessary.</p>	<p><i>4.3 a. Check in with family</i></p> <p>Facilitator leads team in creating a procedure for checking in with the youth and family periodically after commencement. If new needs have emerged that require a formal response, facilitator and/or other team members may aid the family in accessing appropriate services, possibly including a reconvening of the wraparound team.</p>	<p>The check-in procedure can be done impersonally (e.g., through questionnaires) or through contact initiated at agreed-upon intervals either by the youth or family, or by another team member.</p>
