# Quiz

Human service and educational agencies and systems often convene teams to work collaboratively on plans for serving children or youth. This is particularly true for children and youth who are involved with multiple systems or who are felt to be in need of intensive intervention. These kinds of planning teams include IEP (Individualized Education Plan) teams, wraparound teams, foster care Independent Living Program teams, transition planning teams, youth/family decision teams, and other teams that create service or treatment plans. Unfortunately, it is often true that these plans are created *for* youth, with little input or buy-in from the young people themselves.

Does your organization support meaningful youth participation in collaborative team planning? Take this quiz and find out!
