## Building Hope: Supporting Youth in Special Education and Foster Care

Jessica Schmidt  
Lee Ann Phillips  
May Kane

# Characteristics of Youth in Foster Care

	Nationally	Oregon
How many children in care?	408,452	8,718
Sex	52% male, 48% female	51.2% male, 48.8% female
Age of children in care	Age 0-5: 36% Age 6-12: 28% Age 13+: 36%	Age 0-5: 39.4% Age 6-12: 31.2% Age 13+: 29.4%
Reason for entering care	Neglect: 78% Physical abuse: 18% Sexual abuse: 10% Other abuse: 10% Psych. maltreatment: 8% Medical neglect: 2%	Threat of harm: 49.6% Neglect: 31.4% Sexual abuse: 8.7% Physical abuse: 8.4% Mental injury: 1.9%

# Race/Ethnicity

Race	U.S foster care	Oregon foster care	Oregon children overall
African American	29%	8.3%	2.5%
Hispanic	21%	13.7%	19.8%
Caucasian	41%	64.4%	68%
Native American	2%	6.9%	1.3%
Other/multiracial	8%	8.4%	6.7%

# Youth in Foster Care

How many teenagers age-out of foster care each year?

- Approximately 27,854 nationally
- Another 1500 or so run away
- In Oregon, approximately 400 youth age-out each year

# Outcomes for youth exiting foster care

Youth aging out of foster care struggle as young adults:

- 50% use illegal drugs
- 25% were involved in the legal system
- 1 out of 4 experienced homelessness
- 2x more likely to be a single parent
- Substantially lower levels of education and employment
- Higher levels of poverty

# Rates of Disability

- About 60% of older youth in foster care receive special education services (IEP) and 25% receive services for a Developmental Disability (DD) (Schmidt et al., 2013)
- Casey Alumni Study found that over 50% of former foster youth have diagnosed mental health problems (Pecora, 2005). In Oregon, 70% of youth had a DSM diagnosis (Hogensen, J., 2007)

# Outcomes for youth with disabilities exiting foster care

Foster youth with disabilities were less likely than other foster youth to:

- Be employed
- Graduate from high school
- Have social support
- Be self-sufficient
- Only **16%** of foster youth in special education with a primary disability of emotional disturbance graduated from high school; **18%** left school because they were incarcerated (Smithgall, Gladden, Yang, & Goerge, 2005).

# Outcomes for youth with disabilities exiting foster care: Education

## Foster youth:

- Almost half repeat a grade
- Drop out 2x as often
- High rate of absenteeism
- Only 20% who graduate attend college while most want to go to college (84%)

## Foster youth in SPED

- lower GPAs
- Changed schools more often
- Earned fewer credits
- Had lower state test scores
- Had more restrictive SPED placements
- Were more likely to attend an alternative school (Geenen & Powers)

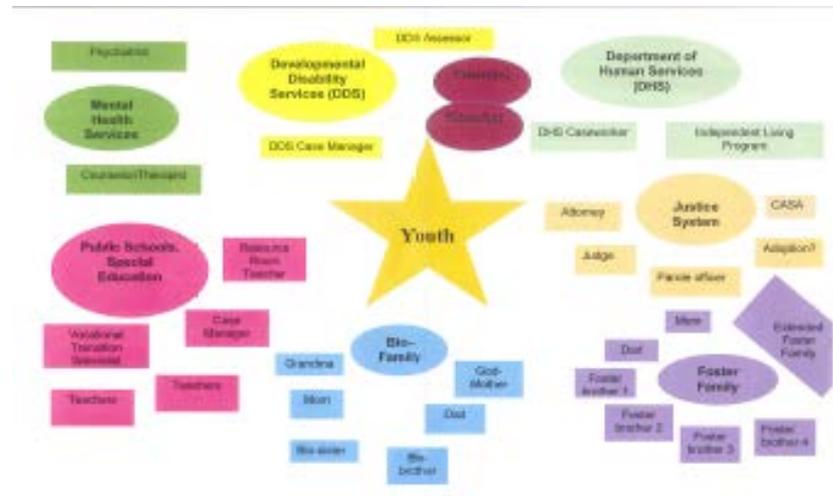

# Barriers to School and Transition Success

- Lack of parental advocate
  - High mobility
  - Focus on safety vs optimizing independence and participation
  - Trauma, poverty, separation from family
  - Challenges around communication/collaboration between systems
- Best predictor of positive adult outcomes for foster youth:
    - EDUCATIONAL ACHIEVEMENT

# Self Determination

## *A System to Navigate for youth with Disabilities*

# My Life and Better Futures

- Funded by Department of Education and National Institute of Health, NIDDR, SAMHSA
- Principle Investigators: Laurie Powers, Sarah Geenen
- First opportunity to experimentally study the longitudinal impact of self-determination enhancement on youth in foster care with disabilities
- First experimental study of **self-determination** enhancement or any transition intervention with foster youth, with or without disabilities

# Project Eligibility

Randomized intervention with participants who are:

- Currently in foster care
- Experience a serious mental health condition and/or disability
- Live in targeted geography
- Open to the idea working on goals
- Open to having a coach

# Project Goals

*Goal of the Better Futures Project-* Implement and test a comprehensive intervention to assist young people in foster care with a serious mental health diagnosis prepare for and participate in post-secondary education.

*Goal of the My Life Project-* to test an intervention to enhance the self-determination of youth in foster care by promoting transition outcomes.

# Self Determination

## Our definition:

- Information* to be able to make decisions
- Opportunities* to do activities, take risks
- Support* from trusted others
- Self-direction* / other-direction skill
- Incorporate* accommodations as universal rather than special strategies
- Believe in *youths' capacities and rights* to be self-determining and have typical lives, regardless of labels
- Use *strength based* theories and practices
- Include* youth in decision making
- Nothing* about them without them

# Research Design

- Youth identified by comparing DHS and School District databases
- Foster youth with or without disabilities, 16.5 to 18 years of age, were randomly assigned to either the control or TX group
- Youth were enrolled in waves
- Youth were evaluated at baseline, conclusion of TX (12m) and 12m post-intervention

# Elements of the Intervention

- One-to-one mentoring with a coach
- Group mentoring workshops with alumni and peers
- Summer Institute (Better Futures only)
- Coordinated transition planning
- Training for professionals
- Parent support
- Connecting youth to adult allies, partnership agreement

# Self Determination

## *Coaching Approach:*

- Work through the students, not around them
- Respect individual differences in learning and maturity
- Help youth learn how to direct support
- Keep communication open and positive
- Recognize student-initiated goals and support them
- Interpret lack of follow-through as a need for more support
- Support youth around youth-directed goal development and achievement.
- coaching vs. training
- Assist, encourage and challenge youth to successfully apply generic strategies to achieve personally-valued goals

# Self Determination

Youth in TX group meet with coach 1x per week. Using the *Take Charge* curriculum, coaches support youth around youth-directed goal development and achievement. Coaching model emphasizes:

- ~Youth has mastery experiences
- ~Achieving bite-size goals
- ~Managing problems
- ~Academic success
- ~Youth attributes success to what s/he did and builds confidence
- ~Youth increases support network
- ~Strategies become “imprinted” in youth’s consciousness
- ~Learns about resources and accommodations
- ~Learning in a natural setting
- ~Building Partnerships
- ~Informed decision making

# Group Mentoring

- Foster care alumni serve as mentors (some are former project participants)
- Workshops held monthly and always include a fun event
- Topics for workshops include college, relationships, running your own meeting, employment/careers, transitioning out of care, wellness, other youth selected topics
- Provides opportunities for youth to hear the transition stories of alumni and ask questions
- Can provide opportunities for youth to explore/hear about college life, careers, and strategies to have positive transition outcomes
- Opportunity to meet youth in similar circumstances and provide peer support to one another

# Results

Significant changes were noted in the following areas:

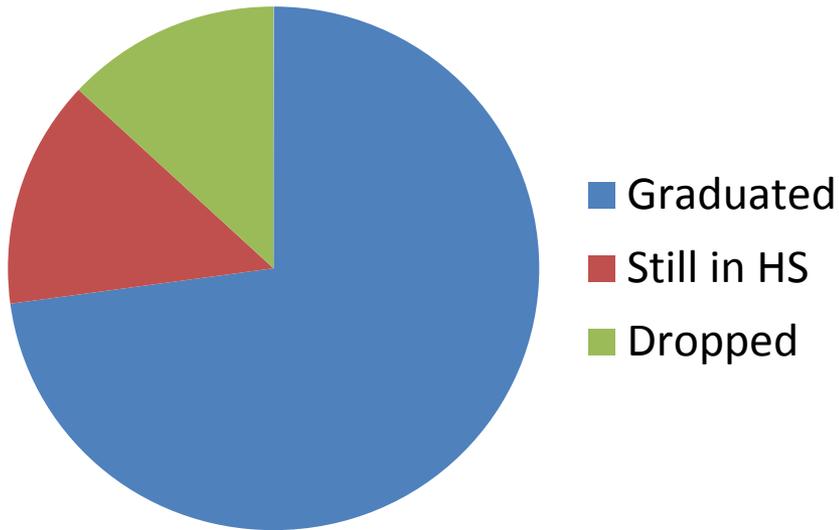

- Self-determination
- Perceived quality of life
- Transition planning

Other notable improvements:

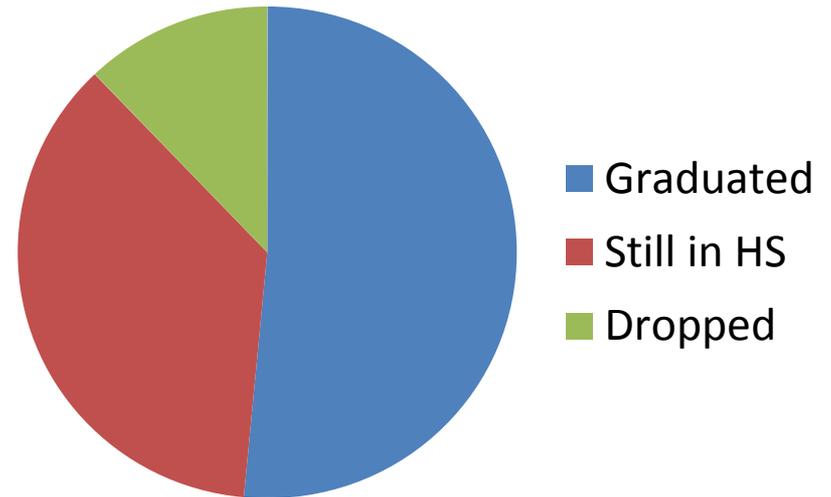

- Educational outcomes
- Percentage employed
- Perception of being prepared for life as an adult
- Engagement in independent living activities

# Educational Status at T3

**TX**

**Control**

# Self-Determination

## Positive Outcomes:

- Inclusion and Interdependence
- Builds through mastery including learning how to manage challenges
- Young people with high self-determination are more likely to be employed and live independently (regardless of severity of disabilities or MH condition).
- Youth has mastery experiences
- Managing problems and achieving goals
- Academic success
- Youth attributes success to what s/he did and builds confidence
- Youth increases support network
- Strategies become “imprinted” in youth’s consciousness

# Self Determination

## *Ideas and Suggestions:*

- Convey **respect** and appreciation for the young person and their culture(s)
- Promote **self-determination**, self-efficacy (and related skills), and hopefulness
- Create an environment that feels **safe and predictable**, but also allows for some level of experimentation and failure
- Include youth** in program development, advisory boards and direct service
- Affirm and respect** young people's perspectives and experiences
- Ensure that activities, therapy, classes feel relevant to **personally meaningful goals** (though goals can change)
- Focus as much on **process** as outcomes
- Build **positive connections** to family, peers, community
- Be transparent and **instill trust**
- Help them find that **sense of purpose**

# My Life and Better Futures

- What was some barriers in your life that made it difficult to meet and reach your goals?
- How did your coach help you meet your goals?
- How was this program different from other support you have had in the past?
- Share about your Youth-Led Meeting.
- Suggestions for adults on how best to assist youth to be successful?
